ECOSYSTEM

KIMCHI PAPER V.2.06_2025

INTRODUCTION

Madame Kimchi was born from a simple idea.

What if a cryptocurrency project could unite blockchain innovation with real-world impact in the food industry?

Unlike traditional cryptocurrencies, which often thrive on speculative value, Madame Kimchi aims to create a tangible difference by bridging cryptocurrency with food payments, decentralized food banks, and sustainability.

Our founder, Che-Sun Lee, once said, “We are an experiment in blockchain-powered culinary revolution.” This bold vision laid the foundation for a project designed not just for profit, but to tackle global food security challenges and create lasting social good.

At the heart of our ecosystem lies community. Food has always brought people together, and now blockchain technology can do the same. Madame Kimchi is not just a cryptocurrency; it is a movement where food, culture, and sustainability converge to create a future that benefits all.

We believe in a future where blockchain helps solve real-world challenges, promote healthy eating, and empower communities globally. Together, we can create a world where cryptocurrency drives a meaningful, sustainable impact. This is how we will shape the future.

Madame Kimchi has now entered its next phase, launching an ecosystem where food and blockchain are no longer just ideas but integrated into real-world solutions.

WHY DECENTRALIZATION?

We are standing at a pivotal moment in innovation.

For centuries, centralized systems have governed global industries in political, financial, or technological. But the rise of blockchain challenges these norms. Madame Kimchi embraces decentralization not just as a philosophy, but as a practical tool to empower individuals, communities, and businesses alike.

Blockchain web3 era, at its core, disrupts traditional finance and allows individuals to reclaim autonomy over their wealth and decisions. Madame Kimchi takes this one step further by applying blockchain to a critical area of everyday life: food.

We have seen the barriers that centralized control brings, in financial institutions or the global food system. These structures often stifle innovation, leaving communities at the mercy of a select few.

Our mission is to empower individuals through a decentralized cryptocurrency to drive social change. We are building a global community where everyone has a stake in shaping the future where food systems, sustainability, and blockchain work together to create lasting impact.

LOVE FOR OUR COLLECTIVE

We are proud of where Madame Kimchi originated and equally excited for the future. From the outset, our founder, Che-Sun Lee, took a leap of faith by starting this project from nothing, passing the baton to our community. Starting with nothing means that everyone must bring something to the table, and the strength of our community has been the driving force behind our growth.

You, our community of holders, believers, admins, influencers, and meme creators, have shaped this project. With over 500,000 contributors worldwide, Madame Kimchi has grown into a powerhouse, driven by a shared vision of social good and sustainability.

Thank you! You are the real Madame Kimchi community, and we salute you.

OUR BACKGROUND

“You can only create your reality into existence.”

“We believe that through the power of collective decentralization, we can build something stronger than any centralized team could ever achieve. A community-driven token holds no value without the united individuals who give it purpose.”

This powerful statement defines Madame Kimchi’s mission: we believe that through the power of collective decentralization, we can build something stronger than any centralized team could achieve. A community-driven token holds no value without the united individuals who give it purpose.

From the very beginning, Madame Kimchi became known for its vibrant community: Cabbage Army, Garlic Gang, and Pepper Troopers. These names didn’t just represent groups; they became symbols of unity, passion, and purpose. For many, joining was not just about following a project—it was about becoming part of something bigger. It became their identity.

We started from zero, with nothing. We didn’t rely on past successes or existing communities; we built our vision from the ground up. Fueled by ambition, innovation, and determination, we brought together a diverse group of developers, designers, marketers, and visionaries to forge this ecosystem.

As we continue to grow, we remain committed to embracing every member’s unique talents, empowering them to shape the future of Madame Kimchi. From anywhere in the world, everyone can contribute to building the future of the food industry with blockchain.

HYBRID SUSTAINABILITY

“To create a meaningful impact, you must first believe in the power of your community.”

In the ever-evolving landscape of cryptocurrency, projects without clear vision and real-world utility tend to fade away. Madame Kimchi is not just another meme coin. We are a socially responsible and innovative project that seeks to redefine the space. Our mission goes beyond the hype and the traditional meme coin narrative. We aim to create a blockchain-powered solution that intertwines community, food, sustainability, and cryptocurrency. This is not about creating a token solely for profit; it is about building a future where blockchain technology is used to solve real-world problems and create positive, lasting change.

Polygon and Tezos were chosen as the dual backbone of our blockchain infrastructure. Together, they provide the scalability, speed, and eco-friendliness necessary to support Madame Kimchi as it grows into the world's leading meme coin and decentralized ecosystem. These two networks were selected because they align perfectly with our commitment to sustainability and innovation.

POLYGON

Polygon and Tezos were chosen as the dual backbone of our blockchain infrastructure. Together, they provide the scalability, speed, and eco-friendliness necessary to support Madame Kimchi as it grows into the world's leading meme coin and decentralized ecosystem. These two networks were selected because they align perfectly with our commitment to sustainability and innovation.

TEZOS

Tezos, with its eco-friendly and energy-efficient Proof of Stake (PoS) consensus mechanism, is perfectly aligned with Madame Kimchi's commitment to sustainability. As blockchain technology evolves, the environmental cost of maintaining a blockchain has become a critical concern. By leveraging Tezos, we can ensure that Madame Kimchi operates in a low-carbon environment, maintaining a strong commitment to sustainability throughout the lifecycle of our tokens.

Tezos also enables secure and scalable smart contracts, providing the technical framework for decentralized food initiatives, loyalty rewards, and community-driven actions. This makes it the ideal choice for Madame Kimchi's mission to bring blockchain technology into the food ecosystem, where sustainability is at the core of every transaction.

EMPOWERING COMMUNITY

When we set out to create Madame Kimchi, we knew that selecting the right blockchain infrastructure was essential to our success. We could have chosen a simple, quick route to get started, but we wanted more. We wanted a solution that would scale globally while maintaining our commitment to sustainability, decentralization, and security. That's why we chose a hybrid approach, combining the speed and cost-effectiveness of Polygon with the eco-friendliness and security of Tezos.

This hybrid blockchain infrastructure ensures that Madame Kimchi is not only positioned for global adoption, but also sets a precedent for future blockchain projects that prioritize both impactful community-driven change and environmental sustainability.

REAL-WORLD ADOPTION AND INNOVATION

We are transforming how people think about food payments, food security, and community-driven sustainability. We can integrate food purchasing, donations, and loyalty rewards into the daily lives of millions of people, all while supporting global initiatives for food sustainability.

The power of decentralization lies in its ability to break down barriers, provide equal access, and redistribute power. We are empowering individuals, communities, and organizations to take ownership of their impact, driving change in ways that were previously unimaginable. Madame Kimchi will leverage blockchain to create a sustainable food economy that directly connects local communities to global causes, ensuring that no one is left behind.

WHY HYBRID APPROACH?

When we set out to create Madame Kimchi, we knew that selecting the right blockchain infrastructure was essential to our success. We could have chosen a simple, quick route to get started, but we wanted more. We wanted a solution that would scale globally while maintaining our commitment to sustainability, decentralization, and security. That's why we chose a hybrid approach, combining the speed and cost-effectiveness of Polygon with the eco-friendliness and security of Tezos.

This hybrid blockchain infrastructure ensures that Madame Kimchi is not only positioned for global adoption, but also sets a precedent for future blockchain projects that prioritize both impactful community-driven change and environmental sustainability.

MADAME KIMCHI INCUBATOR

The Madame Kimchi Incubator is the heart of innovation within our ecosystem. Here, ideas are not just created but nurtured to reach their fullest potential. The Madame Kimchi Incubator is where new projects, powered by the principles of decentralization, sustainability, and community collaboration, will grow into world-changing realities.

We don't just look at financial gain; we focus on empowering individuals to innovate and make a tangible difference in the food systems. The incubator will encourage a wide range of ideas in food tech, decentralized finance, or social good that can bring real value to the ecosystem and beyond.

At Madame Kimchi, we believe innovation can be found in all areas. Whether it's solving global food insecurity, improving sustainability in food production, or creating new economic models for food sharing and payment, we are focused on making food systems more equitable, decentralized, and accessible.

Our incubator isn't just for financial growth; it's for social impact. We will always encourage creativity and foster open collaboration to ensure that Madame Kimchi remains at the forefront of decentralized innovation.

Join us as we push the boundaries of what's possible and create an ecosystem that drives real, positive change!

KIMCHI ECOSYSTEM TOKENOMICS

Madame Kimchi is a revolutionary project at the intersection of blockchain technology, food sustainability, and social good. With the vision of creating a decentralized ecosystem (DECO) that transforms the way food is bought, sold, and distributed, Madame Kimchi aims to solve pressing global issues such as food security, sustainability, and community engagement.

By harnessing the power of cryptocurrency and decentralized finance, Madame Kimchi is paving the way for real-world adoption that benefits everyone involved.

At the heart of this ecosystem lies KIMCHI, CABB, GARC, and PEPP, our four tokens that work seamlessly together to power food payments, reward community-driven projects, and support decentralized food banks.

Madame Kimchi's tokenomics reflect the commitment to sustainability, community involvement, and long-term growth. With a focus on building a truly decentralized, eco-friendly, and socially responsible ecosystem, Madame Kimchi is positioned to stand out as the world's leading meme coin.

TOKENOMICS COMPONENTS

Madame Kimchi's multi-token system ensures scalability, community participation, and long-term sustainability. Each token: KXC, CABB, GARC, and PEPP plays a specific role in the ecosystem, providing rewards, incentivizing actions, and supporting the overall mission of the project.

KXC (Madame Kimchi Coin)

- Primary Currency for food payments, staking, and loyalty rewards.
- Acts as the go-to transaction token for all purchases and rewards within the Madame Kimchi ecosystem.
- Governance Token: KXC holders will have voting rights in community decisions and the ecosystem's future direction.

TOKENOMICS COMPONENTS

CABB (Cabbage Token)

- A food bank token used for donations and food security initiatives.
- Enables stakeholders to contribute to decentralized food banks while earning CABB for their donations and actions.
- Staking for Social Impact: Stake CABB tokens to fund food banks and drive decentralized food security efforts.

GARC (Garlic Token)

- Powers food sustainability and incentivizes decentralized food initiatives.
- Used for loyalty rewards and discounts on Madame Kimchi products and events.
- Encourages community-driven sustainability by rewarding those working on food-related environmental initiatives.

PEPP (Pepper Token)

- Supports DeFi incentives, liquidity farming, and token stability.
- Provides liquidity and stability for the MKC ecosystem, helping ensure long-term growth.
- Used within the broader DeFi ecosystem for liquidity provision and staking rewards.

DECENTRALIZED FOOD BANK & SOCIAL IMPACT INITIATIVE

- **Blockchain-Powered Donation Tracking:** Every donation is tracked transparently on the blockchain, ensuring trust and accountability.
- **Sustainable Food Security:** A portion of MKC and CABB tokens will fund decentralized food banks, providing food to those in need and promoting sustainable food security.
- **Partnerships:** Collaboration with grocery chains and local farms to redistribute near-expired food using blockchain-powered tracking.
- **Staking MKC for Donations:** Users can stake MKC to fund food banks and earn CABB rewards for contributing to the ecosystem.

DEHYDRATED KIMCHI & METaverse INTEGRATION

- **Dehydrated Kimchi:** A real-world product available for purchase using MKC tokens. A portion of each sale funds decentralized food banks.
- **Metaverse Cooking Classes:** Users can attend virtual Korean cooking classes, pay with MKC tokens, and earn exclusive rewards like NFTs or product discounts.
- **NFT Integration:** Exclusive NFTs linked to cooking experiences, offering real-world benefits and access to limited-edition products.

SUSTAINABILITY & CARBON OFFSETTING INITIATIVES

Madame Kimchi's ecosystem will dedicate a portion of the transaction fees toward sustainability projects. These initiatives will focus on reducing food waste, promoting eco-friendly food production methods, and funding carbon offset projects. Additionally, collaboration with environmental organizations will further reinforce the commitment to global sustainability.

TOKEN ALLOCATION AND DISTRIBUTION

Madame Kimchi's Tokenomics

KXC Token Supply

- Total Supply: 1,000,000,000 MKC tokens.
- 50% allocated for staking, rewards, and liquidity farming.
- 20% reserved for partnerships, ecosystem development, and product launches.
- 10% allocated for the DAO fund supporting food bank operations and community governance.
- 10% for marketing and AI-driven viral campaigns.
- 5% for the development and maintenance of the ecosystem and smart contract security.
- 5% for team compensation and advisors.

DAO Fund Allocation

- 50%: Food bank operations and sustainability initiatives.
- 15%: Community rewards and governance participation.
- 15%: Liquidity and staking growth.
- 10%: Marketing and AI-driven content.
- 10%: Technology and security maintenance.

TOKEN ALLOCATION AND DISTRIBUTION

To ensure long-term sustainability, community participation, and fair distribution, the total supply of tokens will be allocated as follows

KIMCHI	40%	<ul style="list-style-type: none">• Community: 40%• Staking Rewards: 15%• Team/Advisors: 20% (vesting over 2 years)• Marketing and Development: 15%• Reserve: 10%
CABB	20%	<ul style="list-style-type: none">• 100% of CABB tokens will fund decentralized food bank initiatives, allowing us to directly address food security.
GARC	20%	<ul style="list-style-type: none">• 60% for rewarding users who contribute to decentralized food sustainability projects.• 40% for staking and community engagement incentives.
PEPP	15%	<ul style="list-style-type: none">• 100% for liquidity farming and DeFi incentives, ensuring liquidity in the ecosystem.
BURN	5%	<ul style="list-style-type: none">• 5% of total KXC supply allocated to regular burns, ensuring long-term scarcity and value growth.

The token distribution is designed to promote ecosystem growth, incentivize participation, and ensure that funds are directed towards food security, sustainability, and marketing.

SUSTAINABILITY

In line with its eco-friendly mission, Madame Kimchi integrates sustainability into its tokenomics. A percentage of the transaction fees collected from the ecosystem will be used to fund carbon offset projects and support sustainability initiatives in the food industry.

CARBON OFFSET PROJECTS

Madame Kimchi will partner with environmental organizations to ensure that the project offsets the carbon emissions generated by the network. This will further enhance its appeal as an eco-conscious project

INCENTIVE STRUCTURE FOR EARLY ADOPTION AND STAKING

To encourage early adoption and long-term engagement, Madame Kimchi offers significant staking rewards and early adopter bonuses:

- | | | |
|--|----------|----------|
| Early | Adoption | Rewards: |
| To incentivize long-term holding and early adoption, Madame Kimchi will offer early adopter rewards for staking MKC tokens in the initial phase. This will include exclusive rewards in the form of CABB and GARC tokens and limited-edition NFTs representing unique contributions to the ecosystem.. | | |
- The community will be a vital driving force behind Madame Kimchi's growth. Through meme wars, governance voting, and AI-generated content, the community will have the opportunity to shape the project's future. The more active the community, the more rewards they will earn in MKC, CABB, and GARC tokens.

PARTNERSHIP

By forming strategic partnerships with key players in the food industry, Madame Kimchi will drive adoption of KXC for food payments and donations. Current and future partnerships include:

Partner with grocery stores, restaurants, and food delivery platforms to allow customers to use KXC tokens for real-world transactions, creating immediate value for the community.

Through strategic alliances with food banks and NGO focused on food security, CABB will be used to fund decentralized food banks, directly contributing to global sustainability.

SUSTAINABILITY

Madame Kimchi's tokenomics supports both environmental sustainability and food security. We use Polygon and Tezos, two blockchain solutions that prioritize low-energy consumption and eco-friendly practices.

Polygon: Ensures fast, low-cost transactions globally, making it easy to scale without sacrificing user experience.

Tezos: A proof-of-stake blockchain, Tezos offers a low-energy solution that aligns with our sustainability goals and commitment to carbon offsetting.

A percentage of transaction fees generated from KXC tokens will be allocated to sustainability projects, such as carbon offset initiatives and food waste reduction programs.

DAO GOVERNANCE

Madame Kimchi operates as a Decentralized Autonomous Organization (DAO), ensuring that the community has a say in the future of the ecosystem.

DAO Voting Power where KXC holders will have the ability to vote on key decisions regarding food security initiatives, ecosystem development, and the allocation of the DAO treasury.

COMMUNITY ENGAGEMENT

Through Meme Wars, DAO governance, and educational campaigns, Madame Kimchi will ensure that the community remains engaged and empowered to shape the future of the project.

Governance

Rewards:

Users who participate in DAO voting will receive additional KXC tokens as rewards for their involvement.

GROWTH

Madame Kimchi's growth strategy includes partnerships with institutional entities such as governments, global NGOs, and large-scale food producers. These collaborations will align the project with global sustainability initiatives and help drive large-scale adoption.

- **Strategic Food Security Partnerships:**
We are actively seeking partnerships with food banks, grocery chains, and global organizations focused on food security to ensure the practical application of our tokens in the real world.
- **Institutional Support:**
Madame Kimchi will work to secure government and institutional backing for its mission to address food insecurity and sustainability at a global scale.

FUTURE OF MADAME KIMCHI

Madame Kimchi is more than just a meme coin. It is a socially responsible, community-driven blockchain ecosystem that focuses on real-world problems and solutions. Through a combination of innovative tokenomics, strategic partnerships, and community engagement, Madame Kimchi is positioned to become the world's top meme coin by driving real-world adoption, sustainability, and social good.

We invite you to join the Madame Kimchi ecosystem and become a part of this revolutionary movement to transform the food industry, improve food security, and support sustainable initiatives.

By integrating blockchain with food, sustainability, and decentralized finance, we are setting the foundation for a better future, where every meal matters and every token counts.

Join the revolution. The best is yet to come!
